

PRESS RELEASE

DOLL Fahrzeugbau is drawing a positive IAA balance

The 61st IAA Nutzfahrzeuge in Hanover was a great success for DOLL Fahrzeugbau GmbH. After 8 exhibition days the Managing Directors Brunhilde Rauscher-Doll and Dr. Manfred Münch could draw a downright positive balance. All three product ranges could benefit from a record attendance.

DOLL introduced the latest concepts in the range of DOLL short timber trailers, for instance the Basic Edition. The new short timber bolster and stakes, the DOLL MAMMUT, were greatly admired. VDA and TÜV took up the subject of tie-down which they demonstrated on a DOLL short timber trailer.

It goes without saying that in the range of heavy haulage DOLL presented the market leader – the VARIO platform trailer. Low-bed as well as VARIO semi low-bed trailers with a great number of technical innovations rounded up the picture.

The BigMove-Group, an amalgamation of German heavy haulage companies, came to visit the DOLL booth. Both parties pointed out the importance of a collaboration between constructor of the special purpose vehicle and the practitioner. At the reception of the BigMove-Group delegation Brunhilde Rauscher-Doll summed up that “everybody concerned profits from this collaboration, first of all by innovative and market driven techniques, and secondly by the growth in know-how regarding the requirements and working conditions of the partner.”

The division MOBILE SYSTEMS shows clearly that DOLL Fahrzeugbau GmbH is found at the highest stage. In this division the DOLL Catering Trucks are developed. Via stroke shears they lift trolleys in their special box bodies up to the hull of the aircraft. Extreme heights are reached at the new Airbus A380 for which DOLL is constructing the catering trucks as one of only 4 contractors worldwide.
