

Handing over of a Doll Vario S3H (D330) to the WTD 41 in cooperation with BwFpS.

technical data:

3-axle-telescope-lowbed-trailer with hydraulically forced steering
Total length approx. 12,420 mm
Extended length of telescope approx. 5,900 mm
Loading height of lowbed approx. 880 mm

Dead weight approx. 12,990 kg
Pay load (technical) approx. 35,010 kg

The department for defense technology for vehicles and tanks (WTD 41) belongs to the German Federal Office of defense technology and procurement (BWB). The WTD 41 is the technical center of competence for the German MoD, the BWB, the armed forces and others.

The FuhrparkService (BwFpS) is a service provider of mobility for the German Bundeswehr.

With this new semitrailer the WTD 41 will be enabled to accomplish reliably many transportation tasks like wheeled vehicles, tracked vehicles and other military equipment.
